Märkte für den internationalen Technologietransfer: Entwicklung eines digitalen Tools für die Internationalisierung bei Fraunhofer

Transferwerkstatt Bonn 16.11.2023

Manuel Molina Vogelsang & Jacqueline Zimmermann

Datengestützte Potenzialbewertung für internationale Transfervorhaben

Märkte für den internationalen Technologietransfer – MarketsFITT

Projektpartner:

Zentrale der Fraunhofer-Gesellschaft & Fraunhofer IMW

Projektlaufzeit:

1.4.2021 bis 31.3.2024

GEFÖRDERT VOM

Strategieentwicklung für Transfervorhaben in Mehrebenensystem komplex

Bedarf für Analyse- und Planungsinstrument für den internationalen Technologietransfer

Fundierte Informationen und Vernetzung sind zentrale Bedarfswelder

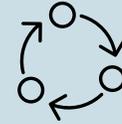

Zentrale Interviewerkenntnisse (n=30) zu Zielen, Vorgehen und Bedarfen

Motive und Ziele

- **Zugänge zu Ressourcen, Kompetenzen**
(Möglichkeiten der Skalierung, Forschungsbedingungen, Fachwissen, Fachkräfte)
- **Zugänge zu Kunden, Märkten** (Kontakt zu Kunden, Industrieerträge)
- Promotion / Einflussnahme („Netzwerkgetrieben“)

Bisheriges Vorgehen

- **Unsystematisches** Vorgehen
- Bisher **stark von Netzwerken** einzelner Personen **abhängig**
- Informationslücken zu:
 - Märkten und Marktpotential einzelner Länder
 - Förderprojekten und Fördergeldern
 - Möglichen Partnern

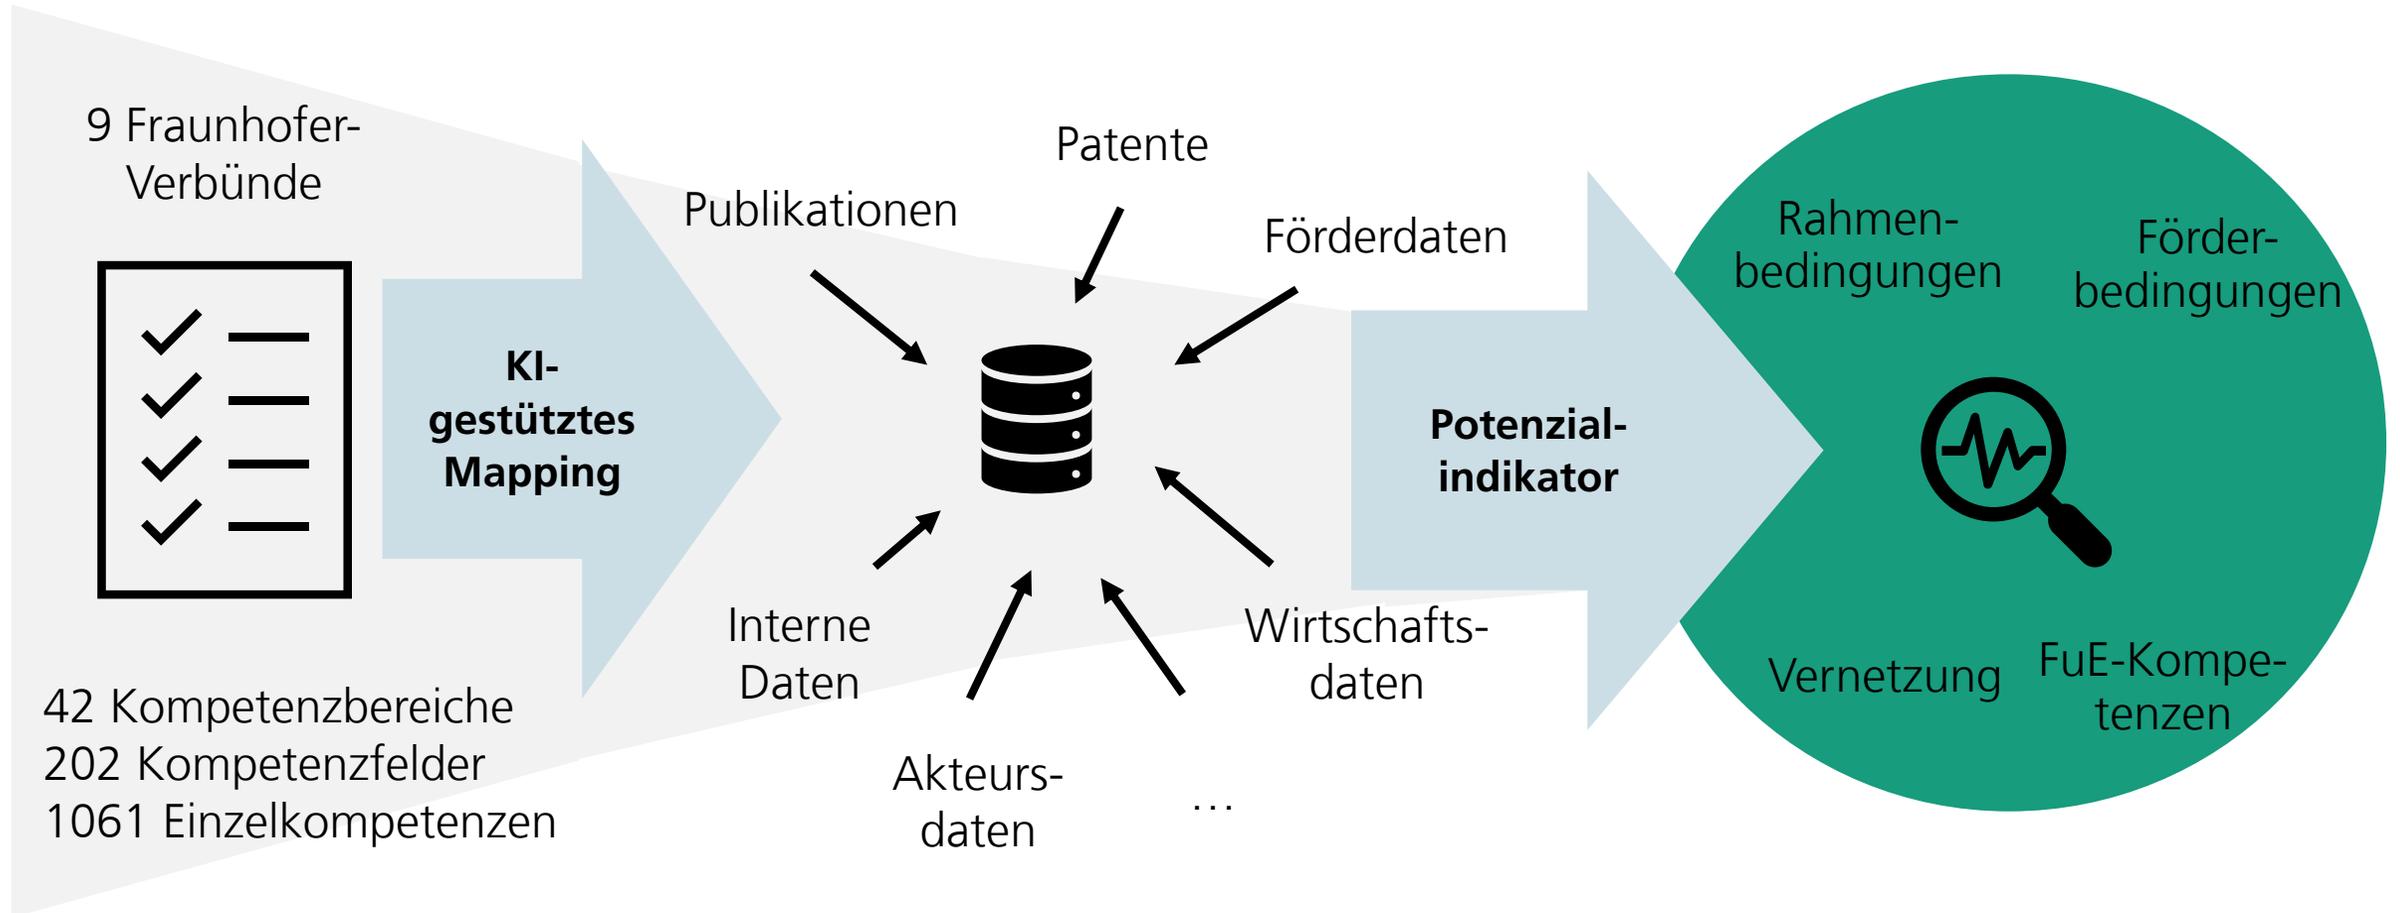

Bedarfe

- **Hilfestellung** bei **Suche** und **Analyse** (Fokus auf exzellente Hotspots der Wissensgenerierung und Sitz der Fraunhofer-Kunden)
- Fokussieren auf bestimmte Forschungs- und Technologieschwerpunkte
- **Beziehungen mit Partnerländern aufzeigen**
- **Vernetzung mit Expert:innen ermöglichen**

Systematische Zusammenführung von Daten zu Potenzialindikator

Kompetenzen der Verbünde als Ausgangspunkt für Toolentwicklung

Umsetzung

MarketsFITT – Markets for international technology transfer

Collaboration with international partners is an essential catalyst for the transfer and economic exploitation of research results and thus a central component of the Fraunhofer strategy. The research project MarketsFITT aims to help researching and evaluating potential foreign markets and R&D partners in your field and beyond.

Scan markets

Select a topic for which you are looking for potential foreign markets and partners.

Stages of Internationalization

Initialization

Realization

Termination / Continuation

Initialization

Initialization describes the phase of finding ideas or topics. A first step can be to search through current BMBF calls for proposals. Platforms can also be the starting point for idea generation.

How-to: Research & Databases

A systematic search across multiple different databases can help scientific employees to find topics, despite having a great deal of expertise in their own subject area. **Literature Databases**

Literature databases such as [Scopus](#), [Arxiv](#) or [Dimension.ai](#) can be used to find the most influential or important publications in a field. A detailed keyword search more often than not results in discovering new interdisciplinary approaches.

Further, Scival – an analysis platform on SCOPUS data – provides insights into which institutions are particularly successful in a topic area and also allows for analyses of the short-term or long-term development of certain topics on a country-level.

Patent databases such as Espacenet or Patbase provide insight into IP applications for a certain topic, which can be very informative for networking in addition to topic discovery. However, it should be noted that there is no standard nomenclature for actors, which can make it difficult to find all relevant IP applications of an actor.

Cordis lists all EU projects funded since the 1980s. Kooperation international, provides an overview of all projects funded by the Federal Ministry of Education and Research with an international dimension.

Networking

This phase includes the search for partners for the respective project, be it for a concrete project, the cooperation with existing foreign units of the Fraunhofer Gesellschaft or the establishment of new structures for international cooperation. Although the phase officially ends with the formalization of any collaboration, networking with experts remains a constant task, especially in an international context.
